

El Kouch Achraf – Software Developer

Junior Software Developer, passionate about coding and driven by creativity. I love turning ideas into useful applications, crafting elegant solutions to complex problems, and learning at lightning speed. Curious, self-driven, and always ready to tackle a technical challenge, I'm looking for an ambitious team where I can grow my skills while contributing my energy and fresh perspective.

PROFESSIONAL EXPERIENCE

Java Full-Stack Developer – CodiaDev, Casablanca, Morocco

Depuis juin 2025

Worked as a Full Stack Developer, delivering complete solutions from frontend to backend. Built and deployed responsive platforms such as:

- [LYT](#) – a travel website for booking and exploring travel services (Spring Boot, Angular, MySQL)
- [Vicinidicas](#) – a legal services platform helping users access case information (Spring Boot, Angular, MySQL)

Full-Stack Developer & DevOps – Remote (Freelance) with a Digital Agency – Achieve, Netherlands

De janvier 2025 à mai 2025

Worked remotely as a Full Stack Developer and DevOps engineer on multiple freelance projects, handling end-to-end development, deployment, and maintenance :

- [Achieve](#) - A platform providing digital solutions for learning and personal development.
- [winkwing](#) - An AI-powered real estate platform that scans 750+ housing websites and delivers personalized alerts, helping users discover and apply for homes faster.

6-month internship – Vanguard Center, UM6P, Benguerir, Maroc

D'avril 2024 à octobre 2025

- **Front-end Next.js:** Creation of an interface to manage tickets and projects, similar to GitHub Issues.
- **Backend Management with Django:** Administration of the backend features of the intranet, including user and data management.
- **Security and Performance Optimization:** Implementation of security practices and optimization of system performance.

EDUCATION AND CERTIFICATIONS

Software Engineering – 1337 Benguerir – Coding School, Benguerir, Maroc

Depuis septembre 2022

- **Webserv:** An HTTP server written in C++98, capable of handling HTTP requests, serving a static website, and executing CGI scripts.
- **Java Journey:** A progressive learning structure, covering basic Java concepts up to complex frameworks and applications.
- **Inception-of-Things:** Kubernetes infrastructure with K3s and K3d, virtual machines configured with Vagrant, web application deployment, and continuous integration with Argo CD.
- **Pong Game:** Real-time multiplayer game with matchmaking, OAuth authentication, 2FA security, and real-time chat, using NestJS, TypeScript, React, Docker, and PostgreSQL.

Scientific and Technical University Studies – faculté des sciences et techniques, Mohammedia, Maroc

De 2019 à 2021

Baccalauréat in Physical Sciences – Abdo El Karim Khatabi – High School, Mohammedia, Maroc

De 2018 à 2019
